Additional information

Contents & Purpose

The purpose of this activity is for students to get to know the basic qualities and stories associated with a given Olympian. A student will choose (or be assigned) one Olympian to describe on a poster (digitally but can also be a physical poster). The poster should include an illustration of the Olympian, associated myths and symbols, and explain his/her domain of power. Students should also summarize one of the myths associated with the Olympian.

Further comments

This activity has students think critically about what the most important information to present about the god/goddess is. It also has students think about the best ways to present information and choose those when creating the visual representation.
